DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/10/2005 has been entered.

Allowable Subject Matter

2. Claims 9 and 35 are allowed.

3. The following is an examiner's statement of reasons for allowance: The closest prior art is Vehse (US 3,648,653) and Mada et al (JP 57-95893). The combination of Vehse and Mada et al teaches a process of liquid phase growth comprising immersing a plurality of substrates in a melt, growing a crystal on a surface of the substrate, rotating the crucible independently from the substrates, and the substrates are set aside from the center of rotation, wherein no part of the substrates is disposed at a center of rotation of the crucible, and the substrates are set upright. The combination of Vehse and Mada et al does not teach or suggest the plurality of substrates extends outwardly in a common radial direction from the axis of the center of rotation of the crucible, such that each of the plurality of substrates is set upright.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
